(2) Use Regulations. It is the intention of this Section of the Code to allow for types of uses that are commonly found in and compatible with, a high-density business core. The uses permitted in these districts are those which minimize negative impact upon and which are compatible with the use and enjoyment of the public sidewalks and public space by large numbers of people and which enliven and enhance the public use, experience and enjoyment of these spaces. Therefore, the specific uses permitted in these districts shall be the erection, construction, alteration or use of buildings and/or land for:

(a) Parking garages, whether above or below ground level when the lot on which it is located has frontage on any of the following streets:

(4) Area Regulations. These regulations are intended to encourage mixed-use development that is sympathetic to and compatible with the existing pattern of development. Their goal is to protect and reinforce the historic scale of certain areas and to ensure the continuity of use and architectural scale in other areas. These regulations recognize that some areas of Center City are more appropriate than other areas for the erection of tall, dense buildings and, therefore, encourage such development in some areas while discouraging it in others. These regulations are intended to ensure that new development creates lively, well lit, attractive and useable sidewalks and public spaces and to encourage the creation of unique and exciting new areas of public enjoyment.
