Manage current stormwater discharge pattern from Dominant Parcel onto and over Servient Parcel pre- and post-construction of the new elementary school by proposing a surface infiltration basin and installing infrastructure, known as a level spreader, on the Dominant Parcel that has the ability to allow the stormwater discharge to spread and flow onto and over the Servient Parcel and mimic the current natural flow of stormwater discharge.

 - e. Refrain from any activities or construction of any improvements at the Dominant Parcel that will materially affect the operations of the stormwater management facilities without the prior written approval of the PWD and Grantee, such approval not to be unreasonably withheld or conditioned.
